SKU: AK30S

Categories: [Stihl](#)

### Product Description

#### STIHL AK30S BATTERY

The STIHL RAPID Duro 3 chain is a low-kickback version of the previous model. It stays sharp up to four times longer than standard chains. With standard-sized cutters, the RD3 is extremely durable and produces very good results in all types of wood. It is especially suited for cutting dirty wood, treated wood, roots, and hardwoods, which would quickly dull conventional chains. This chain must be re-sharpened with a formed diamond grinding wheel. Applications: The RD3 chain is especially suited for cutting dirty wood, treated wood, roots, and hardwoods.

### Features

- Carbide saw chain for extremely tough jobs
- Ideal for horticulture and landscaping
- Remains sharp for very long periods without re-sharpening
- Low vibration and kickback thanks to the humped drive link
- Extremely robust and highly durable
