Product Description

STIHL FSA 200 Battery Powered Grass Trimmer (Unit Only)

This powerful battery-powered bike-handle trimmer is designed for professionals to take on a wide range of landscaping projects.

The FSA 200 is the most powerful battery-powered bike-handled trimmer in the STIHL lineup. Professionals can count on dependable performance while using this durable, weather-resistant trimmer, which is built for a wide range of cutting applications, including trimming, cutting, and weed clearing. The FSA 200 features an increased cutting width and a variable-speed trigger, offering optimal performance and longer run times, so professionals can take on a range of landscaping projects with maneuverability and control, while its anti-vibration system helps reduce fatigue. Built with a brushless motor that makes it virtually maintenance-free, the FSA 200 allows professionals to get more work done with less downtime.

This tool is IPX4-rated weather-resistant construction and has been designed and tested for splash water protection.
