### Product Description

#### STIHL GTA 40 Battery Garden Pruner (KIT)

SKU/Model: GTA-40-(KIT)

The **STIHL GTA 40 Battery Garden Pruner (KIT)** delivers commercial-grade, handheld cutting performance engineered specifically for in-tree professional use, landscaping, and advanced tree-care tasks. Driven by a high-efficiency **brushless motor**, this cordless tool offers an incredible **520 W of power**, unleashing 90% more power and double the cutting capacity of previous generations like the GTA 26. Whether you are clearing thick overgrowth, trimming hard-to-reach limbs, or sizing timber on a job site, this specialized kit provides a lightweight, emission-free solution that behaves with the structural muscle of a full-scale chainsaw in a highly maneuverable frame.

Engineered for maximum endurance and productivity, the **STIHL GTA 40** features an innovative **double battery compartment** designed to hold two power cells simultaneously. Operating on the ultra-reliable **STIHL AS 2 battery system**, it achieves up to **190 cuts on a full charge** or up to 50 minutes of continuous runtime. To ensure uncompromised efficiency, its integrated **Constant Power** electronics maintain consistently high cutting performance regardless of the battery's remaining charge state. The kit comes fully equipped for immediate operation, including two AS 2 batteries, an AL 5-2 high-speed charger, and a rugged, hard plastic carrying case engineered to securely organize the tool, lubricating oil, and up to six batteries.

Precision and ease of maintenance are at the forefront of this tool's design. The pruner is paired with a premium **6-inch LIGHT 01 guide bar** and a 1/4-inch PM3 saw chain, ensuring clean, precise cuts through branches up to 5 inches in diameter. Unlike entry-level models, the GTA 40 boasts an **automatic chain oiler** supplied by an onboard oil reservoir, significantly reducing upkeep and extending the working life of your bar and chain. For added on-the-job convenience, a **side-access chain tensioner** allows quick adjustments using a bar wrench, while toolless bar and chain removal simplifies routine servicing.

Safety and durability remain paramount in demanding field environments. This heavy-duty pruner is built with an **IPX4 weather-resistance rating**, providing vital splash-water protection during damp conditions or light rain. The advanced ergonomic housing includes rubber overmolding for a confident grip, an ambidextrous thumb safety switch, and a robust trigger-switch lockout to prevent accidental activation. Additionally, it features built-in dual metal tether points and a split ring for securing the tool safely to a safety harness or tool belt when operating at elevated heights, making it an indispensable asset for trained arborists and selective yard warriors alike.

## Key Features & Performance Benefits

- **Dual Battery Compartment:** Houses two AS 2 batteries to extend runtimes and double your overall cutting output without returning to the truck.
- **520 W Brushless Motor:** High-performance motor delivers up to 90% more cutting power than previous generation mini-saws.
- **Automatic Chain Oiler:** Built-in oil reservoir automatically lubricates the bar and chain for reduced maintenance and lower friction.
- **6-Inch LIGHT 01 Guide Bar:** Perfectly balanced to optimize maneuverability inside tight, hard-to-reach branch junctions.
- **IPX4 Splash Protection:** Robust weather-resistant construction ensures reliable performance in variable, wet outdoor environments.
- **Constant Power Electronics:** Intelligent circuitry safeguards against power drops, delivering uniform high-speed cutting until the battery is depleted.
- **Side Chain Tensioner:** Convenient side-access screw provides hassle-free tension adjustments with a standard bar wrench.
- **Pro Tool Tether Points:** Integrated dual metal loops allow simple attachment to tool belts or climbing harnesses for safe aerial work.
- **Premium Hard Storage Case:** Heavy-duty plastic carrying case organizes and holds the pruner, charger, and up to six independent AS 2 batteries.

## Technical Specifications

Item	Value
Power Source	STIHL AS Battery System
Battery Voltage (Rated)	22 V
Battery Voltage (Max)	24 V
Mechanical Power Output	520 W (0.41 kW)
Guide Bar Length	6 in. (Compatible up to 8 in.)
Chain Pitch	1/4 in. P
Chain Gauge	0.043 in.
Cuts Per Full Charge	Up to 190 cuts
Estimated Runtime	Up to 50 min.
Weather Resistance Rating	IPX4 (Splash-proof)
Device Weight (Without Battery)	3.0 lbs
Working Weight (With Batteries)	4.4 lbs
Included Charger	AL 5-2 High-Speed Charger
Included Batteries	2x STIHL AS 2 Lithium-Ion
