### Product Description

#### STIHL KMA 200 R Battery KombiSystem (KMA200)

The KMA 200 R is the most powerful KombiMotor in the STIHL lineup, featuring 50% more power and 12% higher speeds than the KMA 135 R. The loop handle with quick clamp allows for easy, toolless adjustment of the handle, and the carrying ring provides extra flexibility while using the shoulder strap. While the air filter is designed to provide a long-lasting electric engine and electronic module life, the three speed levels allow users to adjust speed based on the task at hand to ensure optimum efficiency. As part of the STIHL KombiSystem, this powerful tool is compatible with the FSS-KM trimmer

### Features

- Powerful battery KombiEngine for professional applications
- Tool only without battery and charger
- Can be used in any weather thanks to tested splash protection
- Prepared for use with a Smart Connector 2 A
- Can be combined with all KombiTools
