Product Description

STIHL MS 194 C-E - 14"

Compact and efficient, this chainsaw features STIHL Easy2Start™ technology and an excellent power-to-weight ratio.

STIHL took a top-rated saw and made it better. The MS 194 C-E has greater displacement, more power, and improved cutting performance versus the previous model. All of this was achieved without adding weight—successfully reducing fatigue. A fuel-efficient engine results in longer run times and less downtime, while the STIHL Easy2Start™ system provides simple starts. Top that with toolless fuel and oil filters for fast and easy refueling. The MS 194 C-E is ideal for felling small trees, tree trimming, and firewood cutting. Experience STIHL innovation at work with the MS 194 C-E.
